RECOVERY AUDIT - NOTHING WAS MOVED FROM MISSING TO AVAILABLE WITHOUT A TIMESTAMP-VALID SOURCE

TRDGO-US SMART MOVE V2 - MISSING-EVIDENCE RECOVERY

Generated 2026-11-02 10:54 UTC | 14:54 Dubai | 05:54 EST New York | 95 stocks audited | audit hash 1b519ee405ecaab6 | read-only: no provider request, no prediction rewritten. Every capture window has closed (events report 2 Nov), so only evidence that existed at capture time could be recovered.

1. Before versus after

	Available /100	Directional /100	Continuation	Contrarian
BEFORE	47.5	37.9	Data Incomplete 90, No trade 5	Data Incomplete 90, No trade 5
AFTER	47.5	37.9	Data Incomplete 90, No trade 5	Data Incomplete 90, No trade 5

Recovered factors: 0 | stocks that gained valid evidence: 0 | stocks improved: 0 | stocks still blocked (DATA INCOMPLETE): 90 of 95. BUY and SELL remain 0 for both strategies; the 60-point minimum, margins and weights are unchanged.

2. Why evidence is missing (8 categories, all factors, all 95 stocks)

Missing-evidence category	Stocks	Points missing
Stale Calendar Or Capture Time Failure	42	1680
Genuine Absence Of Qualifying Activity	86	1290
Historical Snapshot Unavailable	93	1005
Unverified News Semantics	95	950
Provider Error	3	50
Provider Data Not Mapped	1	15

3. What the recovery pass tried

- analyst consensus: searched the saved calendar payloads of 3 observation clusters (30 Oct 15:13, 31 Oct 21:21, 1 Nov 10:38) for UW street_mean_est and Finnhub epsEstimate, plus the 1 Nov estimates snapshot
- options flow: all 5,863 alerts re-run through flowx-1 at 5/10/15/30 days; symbol mapping checked (no mismatch); the frozen 5-day threshold unchanged
- news: 56 headlines checked for ticker collisions, source quality, timestamps and name matching; no independently labelled set exists on this machine
- F3/F5/F7/F8, short interest, ownership, relative strength, implied move: re-read the saved payloads; every available field was already incorporated; no double counting

4. VAL, CE and FANG (55 directional points each)

Stock	Directional	Rule if covered	Unresolved (points)	Why it cannot be closed
VAL	55 /100	Continuation: BUY (bull 35 / bear 2.5) Contrarian: none (bull 19.5 / bear 18)	ANALYST 10, OPTIONS_FLOW 15, NEWS_GUIDANCE 10	cutoff passed; flow: none in lookback
CE	55 /100	Continuation: none (bull 15 / bear 25) Contrarian: SELL (bull 0 / bear 40)	ANALYST 10, OPTIONS_FLOW 15, NEWS_GUIDANCE 10	cutoff passed; flow: none in lookback
FANG	55 /100	Continuation: none (bull 15 / bear 21) Contrarian: SELL (bull 0 / bear 36)	ANALYST 10, OPTIONS_FLOW 15, NEWS_GUIDANCE 10	cutoff passed; flow: nothing attributable

Each would need 5 more directional points that existed BEFORE the cutoff (a qualifying flow, a 7-day consensus revision, or validated news). None did, so they stay DATA INCOMPLETE; they are not signals.

RECOVERY AUDIT - NOTHING WAS MOVED FROM MISSING TO AVAILABLE WITHOUT A TIMESTAMP-VALID SOURCE

UNRESOLVED EVIDENCE, FIXES AND NEXT OBSERVATIONS

5. Analyst consensus history found

94 stocks have saved point-in-time EPS consensus from 3 calendar observation clusters; longest span **43.4 h**; 2 series changed (1-2 cents). Below the 7-day band: seen, never scored; nothing older is manufactured and today's consensus is never used as an older one. Finnhub eps: 0 changes; UW street_mean_est: 4 changes of 1-2 cents over 43.4 h. Below the 7-day band, so never scored. The earliest observation (30 Oct 15:13) would reach 7 days on 6 Nov 15:13 UTC, but these events report on 2 Nov.

6. Per-stock unresolved factors, grouped (every stock is listed in the JSON)

Stocks	Unresolved factors (category number)	Examples
45	ANALYST (4), NEWS_GUIDANCE (5), OPTIONS_FLOW (3)	ADEA, AEHR, AEIS, ALG, ALSN, BCC ...
36	ANALYST (4), F3 (6), F5 (6), F7 (6), F8 (6), NEWS_GUIDANCE (5), OPTIONS_FLOW (3)	ADTN, AESI, BLZE, BRCC, BSM, BVS ...
5	ANALYST (4), NEWS_GUIDANCE (5)	AAPL, ON, PLTR, RIG, WMB
2	ANALYST (4), F3 (6), F5 (6), F7 (6), F8 (6), IMPLIED_VS_HIST (4), NEWS_GUIDANCE (5), OPTIONS_FLOW (3)	AHRT, PS
1	ANALYST (4), F3 (6), F5 (6), F7 (6), F8 (6), IMPLIED_VS_HIST (4), NEWS_GUIDANCE (5), OPTIONS_FLOW (1), SHORT_INST (4)	CRD.B
1	ANALYST (4), F3 (6), F5 (6), F7 (6), F8 (6), NEWS_GUIDANCE (5), OPTIONS_FLOW (3), SHORT_INST (7)	HLF
1	ANALYST (4), F3 (4), NEWS_GUIDANCE (5), OPTIONS_FLOW (3)	JAN
1	ANALYST (4), F3 (6), F5 (6), F7 (6), F8 (6), NEWS_GUIDANCE (5)	LIFE

Categories: 1 mapping, 2 saved but unused, 3 genuine absence, 4 history unavailable, 5 unverified news, 6 stale calendar/capture time, 7 provider error, 8 implementation bug (none found).

7. Fixable now versus needs future observations

Fixable now	Nothing in the evidence for these 95 events: every window has closed (cutoff passed) | CRD.B symbol form can be tested with ONE request (needs authorization) for future events | Calendar guard (done): prevents the 42 stale-calendar captures in future runs
Needs future observations	Analyst revisions: daily calendar refreshes from the day an event enters the window give a free street_mean_est history (>= 7 days before capture) | Qualifying options flow: only real market activity | News points: independently labelled headlines | Accuracy: actual outcomes (collectable from 21:30 UTC today for BMO and 3 Nov for AMC events; needs authorization)

8. Verification

Smart Move suite 208 passed / 1 skipped / 0 failed; frontend type-check and production build clean (2 Nov 2026). Main-repo backend suite 1262 passed on 1 Nov. V1 files and the frozen V2 scoring file were not modified.
